## Standard Subdivisions

- Optional
- Recommended for a large number of items within a specific topic

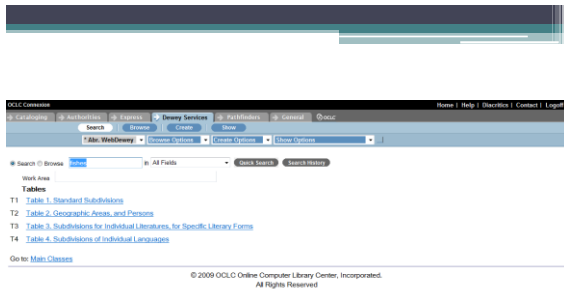

## Facets defined by Subdivisions listed in Tables

- Format (e.g. dictionary, serial, catalog)
- Approach/Viewpoint of author (e.g. history, philosophy, criticism of a work)
- People (e.g. women, gifted persons)
- Location (e.g. torrid zone, Greater London)
- Literary form (e.g. poetry, drama)
- Use of language (e.g. grammar, etymology)

## Source of Subdivisions/Instructions for adding Subdivisions

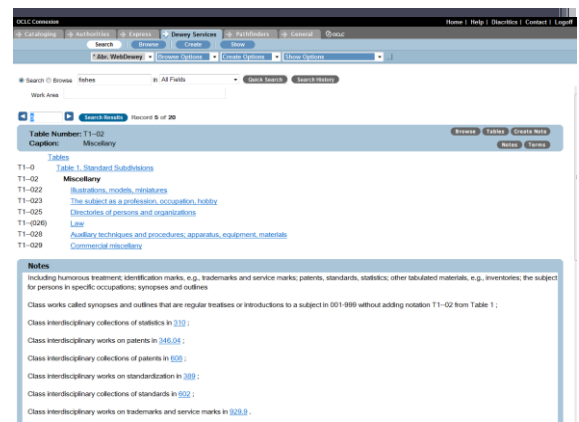

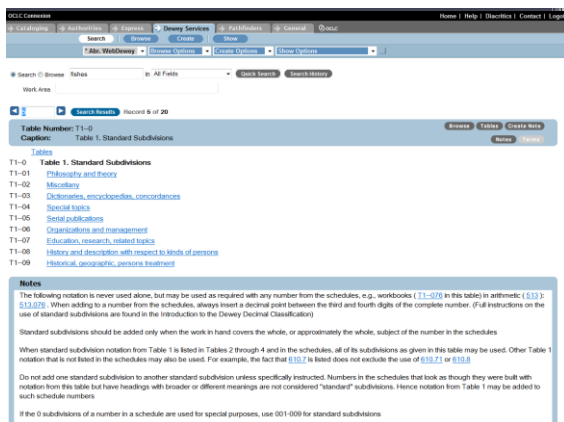

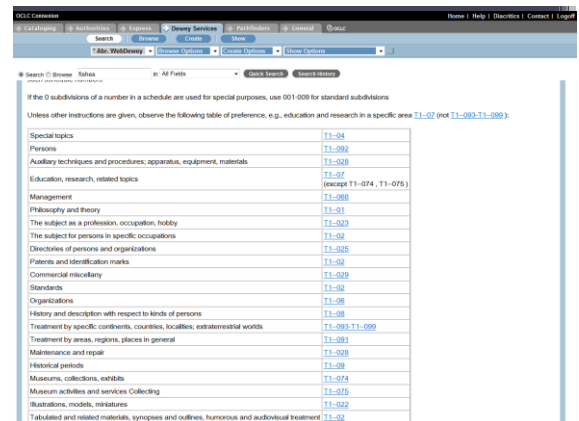

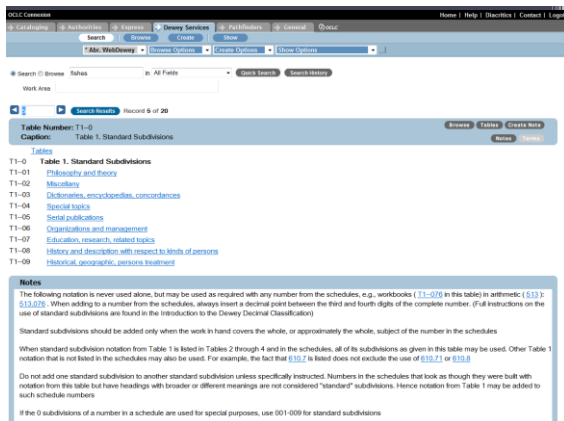

- Tables
- In Abridged DDC, four tables are used (as opposed to six tables in the full DDC)
- Schedules
- Introduction 8.1-8.18
- Manual

## Table 1. Standard Subdivisions: Facets

- Format (e.g. dictionary, serial, catalog)
- Approach/Viewpoint of author (e.g. history, philosophy, criticism of a work)
- People (e.g. women, gifted persons)
- Location (e.g. torrid zone, Greater London) in conjunction with Table 2

## Table 1 Usage

- Standard subdivisions may be added directly from Table 1 at any time unless:
  - the Schedules explicitly forbid it
  - the topic of the item is only part of the number or is given “standing room” only (Listed as “including”)
  - there are certain restrictions specified in the Schedules
  - it would be redundant

Notes section:

The following notation is never used alone, but may be used as required with any number from the schedules, e.g., workbooks (T1-07 in this table) in arithmetic (633): 633.07. When adding a number from the schedules, always insert a decimal point between the third and fourth digits of the complete number. (Full instructions on the use of standard subdivisions are found in the Introduction to the Dewey Decimal Classification.)

Standard subdivisions should be added only when the work in hand covers the whole, or approximately the whole, subject of the number in the schedules.

When standard subdivision notation from Table 1 is listed in Tables 2 through 4 and in the schedules, all of its subdivisions as given in this table may be used. Other Table 1 notation that is not listed in the schedules may also be used. For example, the fact that 633.7 is listed does not exclude the use of 633.71 or 633.8.

Do not add one standard subdivision to another standard subdivision unless specifically instructed. Numbers in the schedules that look as though they were built with notation from this table but have headings with broader or different meanings are not considered "standard" subdivisions. Hence notation from Table 1 may be added to such schedule numbers.

If the 0 subdivisions of a number in a schedule are used for special purposes, use 001-009 for standard subdivisions.
